

CRUSHER

Support Services (Pty) Ltd

Expertise grants Trust

WHY CRUSHER SUPPORT ?

Overhaul, refurbish, commission, Primary Gyratory Crusher and apron feeder at Jwaneng Diamond Mine Botswana. Throughput Capacity of 4000 Tons p/h

Crusher Support Services believes that not all crushers are equal; although two crushers of the same size and make may look the same but will perform contrarily with diverse ore applications. From a diverse viewpoint, the ore/material fed to the crusher/s will have a huge effect on the crusher performance (Throughput, recycle and availability).

Crusher Support Services are a stout advocate of the inter-particle crushing methodology, and follow this principle as close as possible.

Crusher Support Services have confidence in the fact that every crusher must be tweaked to suit the material to enable optimum crushing, thus the reason we start by testing the material and then determine what must be done to optimize the crusher accordingly.

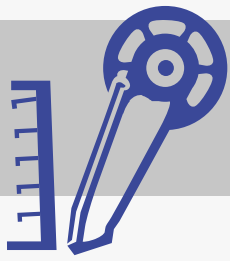

Crusher Support Services is an industry leader in supplying of equipment, tools, service and technical solutions for the mining and industrial industry. Our

offerings covers rock crushing, Primary, Secondary and tertiary applications and materials handling for the industrial and mining sector.

At Crusher Support Services we believe in rendering perfection in everything we do, our highly experienced and professional personnel are extremely customer service focussed and we develop innovative products and services that create sustainable infrastructure and promote efficient use of our resources.

We Recognise the right of all our employees and clients to a healthy and safe work environment and comply with legislation imposed upon by our company as well as codes, rules and procedures required by our clients.

By holding ourselves to the highest standards we strive to meet our clients challenges and deadlines and look forward to be given the opportunity to form a partnership with any potential new clients.

ABOUT US

Crusher Support Services (Pty) Ltd is a South African based Company specialising in the rock and mineral crushing industry and in the minerals beneficiation and process technologies. Crusher Support Services provides the expertise to optimize the design of the machinery required to accomplish the process required whether in an aggregate and sand plant or for mineral beneficiation. Crusher Support Services will also operate the plant for a given period of time on a contracted, per ton processed rate or for an incentive share of the business.

Crusher Support Services was established in 2006 to provide a complete and effective mechanical field, installation and maintenance services.

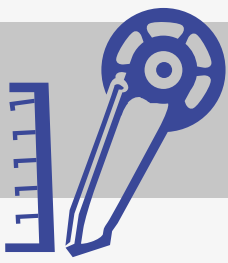

Whilst the Company may appear young it has a wealth of experience of over 60 collective years with its combined staff of 18 persons.

Due to the diverseness of our business (not as in diversified as we are truly focused) we can supply many wear parts for crushers, screens and mills on request and can supply manganese crusher liners at a competitive price.

In addition Crusher Support Services place emphasis on the overhauling and modification of crushers, rock breakers, vibrating and related equipment.

MOBILE CRUSHING PLANT

Overhaul, modify, commission, Primary Gyratory crusher 15525 Kawasaki Crusher Orapa Diamond mine Botswana.

Overhaul, refurbish, commission, Primary Gyratory Crusher and apron feeder at Jwaneng Diamond Mine Botswana. Throughput Capacity of 4000 Tons p/h

ROCK AND MINERAL CRUSHING

OUR SERVICES

Crusher Support services strive to be your partner in long- term performance and maintenance of your plant, we have the competence to provide the true value of your equipment without compromising safety or productivity and keep your plant performing at its peak with flexible design, backed by our continual support.

At Crusher Support Services we specialize in optimization, installation, maintenance, repair and management of industrial and mining mechanical infrastructure such as:

- > Gyratory, Cone and Jaw Crushers
- > High Pressure roll crushers (HPRC or IPC's)
- > Grinding Mills, rod and ball, AGG and SAGG and Apron Feeders
- > Gear alignments
- > Drive Alignments
- > Machine Installations
- > MPI Inspections
- > Apron Feeders
- > Vibrating feeders, etc.

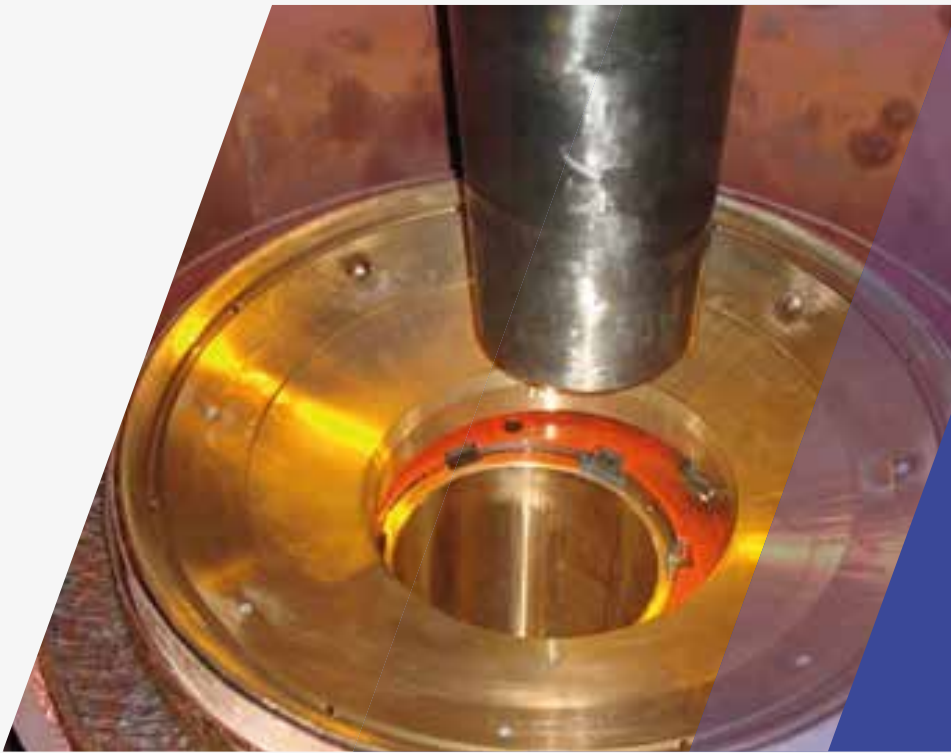

If you're looking for a any installation or repair work done on any mining or industrial equipment, look no further than Crusher Support Services.

Osborn 3042 Jaw crusher, VGF and discharge conveyor, prepare lay down area, build crushing unit, build ramp and gabion wall. Build, commission, run and maintain crushing unit for 12 months, with "ZERO" standing time, for Aquarius platinum, with constant feed of 600t/p/h

INDUSTRIES WE SERVE

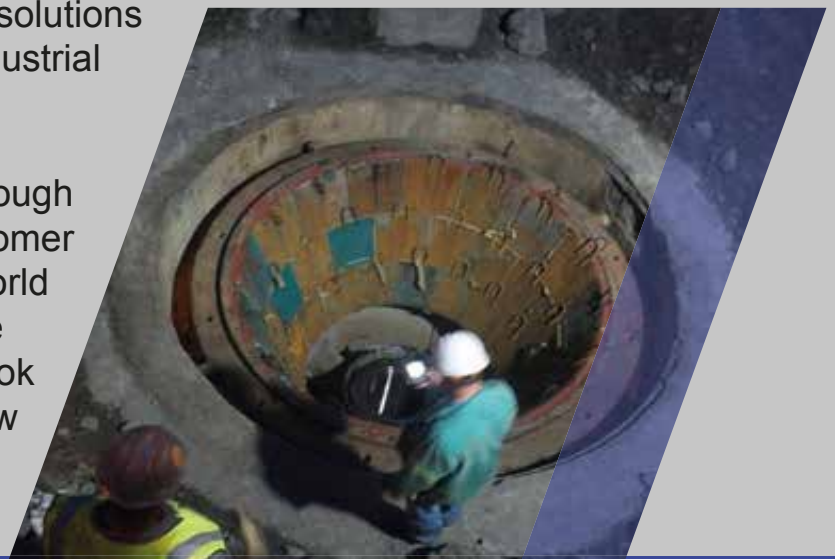

[Marikana Platinum Aquarius – Primary Gyratory Seizure – Repair, change nip angles, changes all internals, bushes, bearings, liners, etc.]

We pride ourselves on our ability to combine leading edge technology, state of the art testing capabilities, extensive in-house experience and 24 hour Field service and site management to provide process solutions to customers.

At Crusher Support Services our in- depth product knowledge, unique experience, continuous development and diverseness of our business allows us to extend our trade to repairing, maintaining and technical solutions for the mining, cement, mineral and industrial machinery industries.

We have built our strong reputation through the quality of our engineering and customer support, drawing on a wide range of world class technologies and products for the benefit of our clients and continue to look for new ways to extend our trade to new markets and industries.

PRIMARY GYRATORY CRUSHER

OUR CLIENTS

Our foremost clients is based in the Diamond and Platinum industry.

In addition we do occasionally serve the Iron, Gold, Manganese, Copper and Coal industries.

Various of our satisfied customers include but is not limited to :
Debswana - Botswana (Diamonds)
Aquarius (Platinum),
Minopex (Platinum),
Chemaf(Shalina resources) DRC

OUR REFERENCES

Our references include:
Minopex (South Africa)
Debswana (Botswana)
Chemaf DRC
Aquarius

[We specialize in optimization, installation, maintenance, repair and management of industrial & mining mechanical infrastructure.]

Crusher Support Services place emphasis on the overhauling and modification of crushers, rock breakers, vibrating equipment and so much more.
